TUFFflex Performance Hot Melt Adhesive

TUFFflex™ Performance Hot Melt Adhesive is a fast setting, freezer grade adhesive with great heat resistance that is suited for use in the beverage, pantry and household dry goods and agricultural industries. With versatile adhesion and high hot tack, it is typically used on cases, cartons and trays. The most suitable substrates are uncoated, clay coated, SBS and similar uncoated and lightly coated materials.

TUFFflex Premium Hot Melt Adhesive

TUFFflex Premium Hot Melt Adhesive can accommodate a broad temperature range and is suited for a wide array of applications where set speed is important. It provides high performance for many case and carton applications such as low compression, high speed package sealing lines. This product creates a robust bond to a wide variety of substrates including high-strength corrugated, highly recycled half-slotted corrugated and difficult-to-bond surfaces such as brightly printed packaging and high spring back containers.
