

## Did you know?

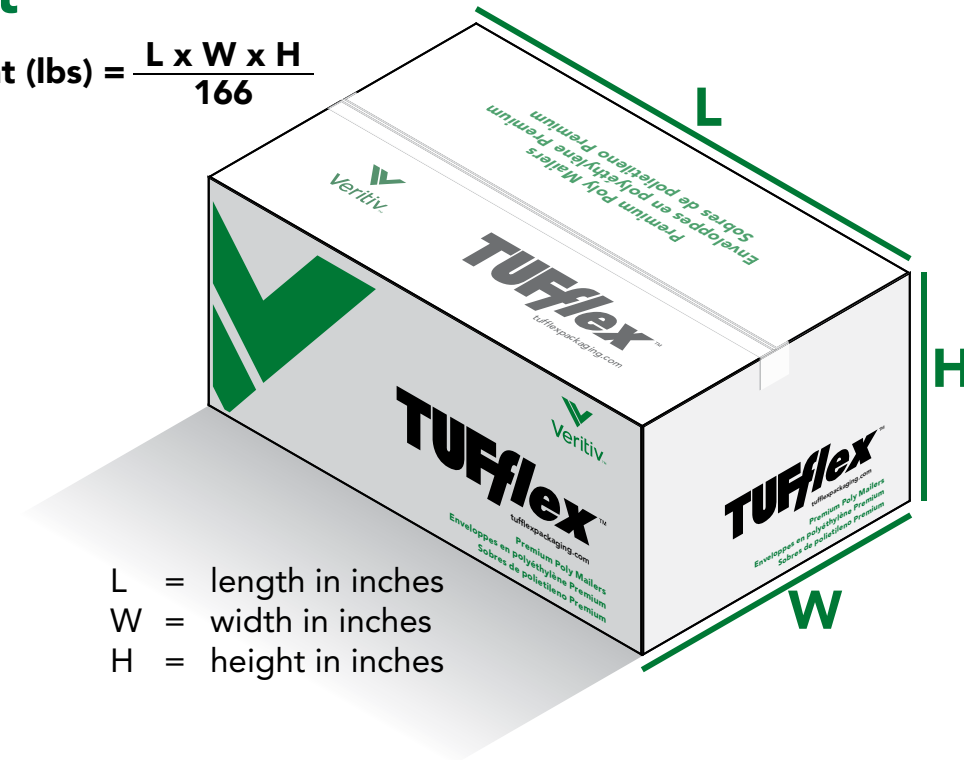

Dimensional weight is a shipment pricing method used by the major package delivery companies. DIM weight pricing is based on volume versus actual weight of shipments. All packages, regardless of size, are now subject to dimensional weight pricing.

## How can we help?

TUFFflex Poly Mailers and Bubble Mailers are alternatives to bulky cartons and offer packaging options that minimize DIM weight and maximize impact. These mailers are constructed of high quality materials to provide the strength and durability required to keep your package intact throughout the entire shipping process.

## How to calculate DIM weight

$$\text{Dimensional weight (lbs)} = \frac{L \times W \times H}{166}$$

## TUFFlex Premium White Poly Bubble Mailers

TUFFlex Premium White Poly Bubble Mailers are made with a seamless bottom and fully laminated cushioning material that provides excellent product protection. They are made with a multi-layer, coextruded film that provides moisture, puncture and tear resistance, especially for heavier items. The strong adhesive closure offers additional tamper resistance and assurance for high-value items.

## TUFFlex Poly Mailers

TUFFlex Premium Poly Mailers come with the industry's most secure closure, an easy peel and quality bag construction. Made with a durable, co-extruded polyethylene film, they're puncture, tear and water resistant. These opaque mailing envelopes are easy to write on, withstand the rigors of shipping and handling, and help provide savings on postage (both stamps and labels).

	V00609	10769253	24" x 24"	White	2.5	125

## Selecting the Right Size Bubble Mailer

### To determine Width of Mailer:

(W) Width of product + (T) Thickness of product + ½"

### To determine Length of Mailer:

(L) Length of product + (T) Thickness of product + 2"

Example:

Tablet: Size of product is 4" x 7½" x 1" (W x L x T) packaged in a standard video mailer box.

	Width		Length	
Width of product	4"	Length of product	7½"	
Thickness of product	1"	Thickness of product	1"	
	+½"		+2"	
Width of mailer	5½"	Length of mailer	10½"	

For the example, use a #1 mailer (7¼" x 12"), which fits both dimensions. The #0 (6" x 10") size would be too small. Usable depth is approximately 1¼" less than stated.
